COMP 3095 · In-Class Exercise 1

Demonstration & Status Checklist · product-service · Spring Boot · MongoDB · Docker · GitLab

Honesty note: The demonstration video has not been recorded yet, so no "Shown" boxes are ticked and no timestamps are invented. Tick items and add mm:ss times only after they appear in your own video. An accurate partial checklist is worth more than a fully ticked one the video contradicts.

Your details

Full name	Emre Kadioglu
Student ID	101443133
Section (in-person day)	Wednesday / Thursday / Friday — circle your section before submit
GitLab username	_____ (not GitHub)
GitLab repository URL	https://gitlab.com/<your-username>/COMP3095-2026
Demonstration video URL	Not recorded yet — add unlisted YouTube / OneDrive / Drive link
Video length (mm:ss)	____:____ (must be ≤ 10:00)
Commit shown in video (first 8 of SHA)	_____ (from git log -1 --oneline, must match GitLab)
Date submitted	_____

A · Introduction

#	Show this	Shown	Time
A1	Title card: name, student ID, section, COMP 3095, "In-Class Exercise 1 - product-service"	☐	
A2	Technologies: Spring Boot, Spring Data MongoDB, Docker, GitLab, Postman	☐	

B · GitLab repository

#	Show this	Shown	Time
B1	Private project COMP3095-2026 on GitLab with Private visibility visible (not GitHub)	☐	
B2	Manage → Members shows s.santilli as Reporter	☐	
B3	Commit history on main shows work beyond the initial commit	☐	
B4	git log -1 --oneline SHA matches latest GitLab commit and the SHA on page 1	☐	

C · Project structure and code

Implemented in the local COMP3095-2026 project. Tick only when pointed at on camera.

#	Show this	Ready in code	Shown	Time

C1	microservices-parent contains product-service; parent has no src folder	Yes	☐	
C2	settings.gradle.kts includes product-service	Yes	☐	
C3	application.properties: port 8080 and MongoDB URI with credentials and authSource=admin	Yes	☐	
C4	Packages model, repository, dto, service, controller under ca.gbc.productservice	Yes	☐	
C5	Product is @Document(value = "product") and price is BigDecimal	Yes	☐	
C6	ProductRepository extends MongoRepository<Product, String> with no methods of its own	Yes	☐	
C7	ProductRequest has no id; ProductResponse does	Yes	☐	
C8	ProductService implements all four methods with log.info on create	Yes	☐	
C9	ProductController delegates to the service, no repository calls, uses @ResponseStatus	Yes	☐	

D · Docker environment

#	Show this	Shown	Time
D1	docker network ls lists mynetwork	☐	
D2	comp3095-mongodb running on 27017 with mongo-data volume	☐	
D3	(Optional) mongo-express on 8081	☐	

E · Run the service

#	Show this	Shown	Time
E1	Started ProductServiceApplication and Tomcat started on port(s): 8080, no exceptions	☐	

F · Endpoint tests (in this order)

#	Show this	Shown	Time
F1	POST /api/product → 201 Created with generated id	☐	
F2	GET /api/product → 200 OK with the new product	☐	
F3	PUT /api/product/{id} → 204 No Content	☐	
F4	GET shows updated values	☐	
F5	DELETE /api/product/{id} → 204 No Content	☐	
F6	GET confirms removal	☐	
F7	IntelliJ console log.info line with the F1 id	☐	

G · Data in MongoDB

#	Show this	Shown	Time
G1	After F1, document in product collection of product-service database (Mongo Express :8081 or mongosh)	☐	

H · Wrap-up

Say this on camera in your own words (do not read a generic “I learned Spring Boot”). Suggested talking points you can adapt:

#	Show this	Shown	Time
H1	Specific learning: DTOs so the request has no id while Mongo generates one; controller never talks to the repository	☐	
H2	Challenge: Mongo auth — URI needed authSource=admin to match the container root user; fixed by aligning credentials and authSource with docker-compose	☐	

Known issues

Video is not included with this draft. GitLab project COMP3095-2026, member s.santilli (Reporter), and a matching git log SHA are not demonstrated yet. GitHub URL https://github.com/emrekadioglu/COMP_3095 cannot be used for this submission. After the private GitLab project is pushed and the ≤10:00 video is recorded, tick only items that appear on screen, fill timestamps, and delete this paragraph if every required item is shown.

Declaration

I confirm that this is my own individual work, that the video shows my own code running on my own machine, and that the repository linked above is the one I demonstrated.

Name: Emre Kadioglu Date: _____ Signature: _____

Before you submit

☐ Video is 10:00 or shorter, and the link plays in a private/incognito window.
☐ Repository URL is on gitlab.com, not GitHub, and s.santilli is a Reporter.
☐ Every ticked item has a timestamp, and anything unticked is explained under Known issues.
☐ All three items are submitted together before Friday, October 9, 2026 at 11:59 pm.
